Zoning & Planning: Making It Easier to Understand

Communication & Media Brainstorm

What Are We Trying To Do?

Make zoning and planning easier to understand, navigate, and use.

Who
needs
information?

What
do they need
to know?

Where does
the correct
information
live?

How should we
communicate
it?

Alignment – How does this support the Comprehensive Plan?

Plain Language

Help me
understand it.

Assume little
or no planning
knowledge.

Working Knowledge

Help me use it
correctly

Use real
terminology,
but explain it.

Technical

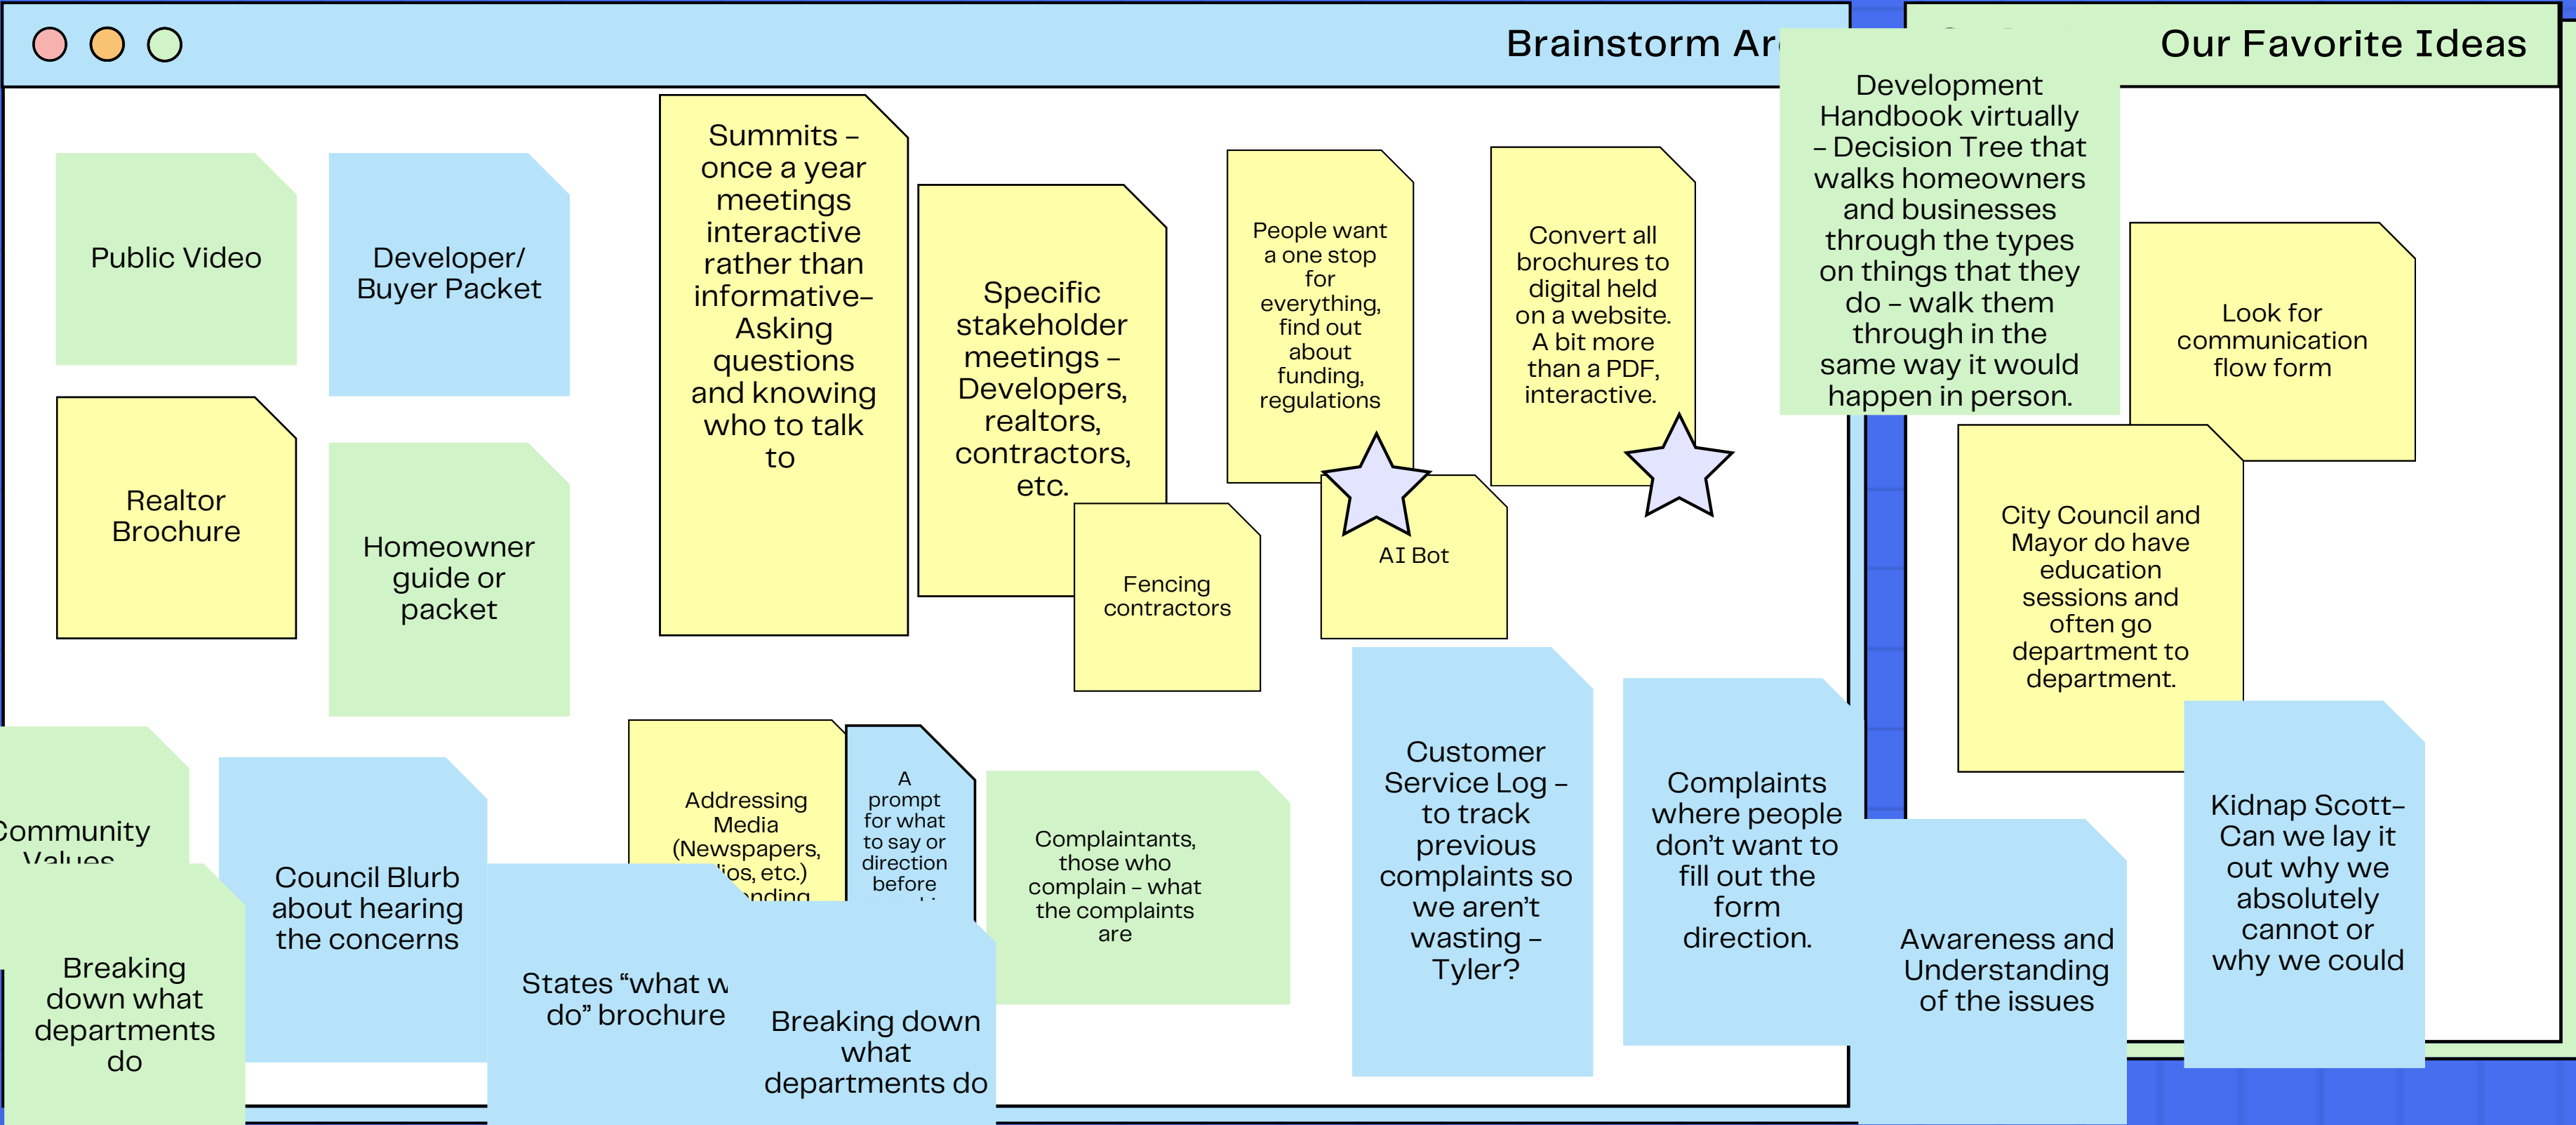

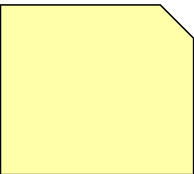

Help me apply it
correctly

Use actual
terminology,
standards, and
processes.

Brainstorm Topic

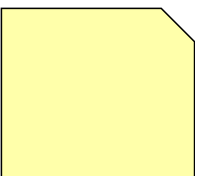

Where are we headed?
What types of media sources
and for who?

*Starting
point

Brainstorm Topic

Who are we talking to?

media

Our Favorite Ideas

What does each group need from us?

o o o o

Residents and Homeowners

What are they trying to DO?

Building garages/ accessory structure, or bringine on in. Adition to their house. Fences. Signs. Decks. Driveways.

What do they need

Every property is unique, and all situations are unique. So people need to come in and talk to us and ask the question. What do I need to know specifically for my property

Overlays, structure standards, set backs

Ordinaces and regulations, and the process they need to go through. Tyler registry, What they can do and how to do it.

Where do they get CONFUSED?

Confused about Tyler and ordinances. Requierment s in some sections arent compatible with other sections.

What do they NOT need?

People may want to know why but not caring where to see it in the ordinance.

What does each group need from us?

○ ○ ○ ○

Group

What are they trying to DO?

Develop quickly and inexpensively without going through the administrative process. Simply. They see the end there's a lot of forgetting that middle. They want the results without the process. Similar to Green but more involvement and more complex.

What do they need to KNOW?

Planning is not quick. Consider all aspects of a project. Complex projects - WE don't control reviewing plumbing permits, there's more that goes to the state. Z&P is just one portion - PROCESS First stop trying to consume information. How they get from A-z and a process flow chart, keeping track of where they are. What is being required for permits, what triggers the need for that permit, is it relevant for this project.

Where do they get CONFUSED?

Process also the data that they're using. Realtors sometimes misuse the use code - ZONING -

What do they NOT need?

They don't need to be put out. Don't want them to feel like they are making it harder for them. Really want to help. Personality dependent on what they do and don't need to know.

What does each group need from us?

o o o o

Group:
Blue –
Technical level

What are they trying to DO?

Communicate what can and cannot actually be done through the city.

Learning in practice

Help and Direct – Operational Knowledge

What do they need to KNOW?

What can be done, but not necessarily how to do it

Who holds that information

What is our process

Overall Department Responsibilities

Checks and balances on codes and regulations

Where do they get CONFUSED?

What is our process

Who holds that information

Checks and balances on codes and regulations

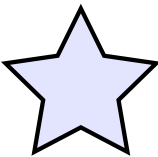

Overall Department Responsibilities

What do they NOT need?

Going back to square one – sometimes basics are appreciated, but mostly not necessary

to represent the city

What terminology, rules, and processes do I need to understand well enough to explain accurately?

Anything Missing?

I need to understand...

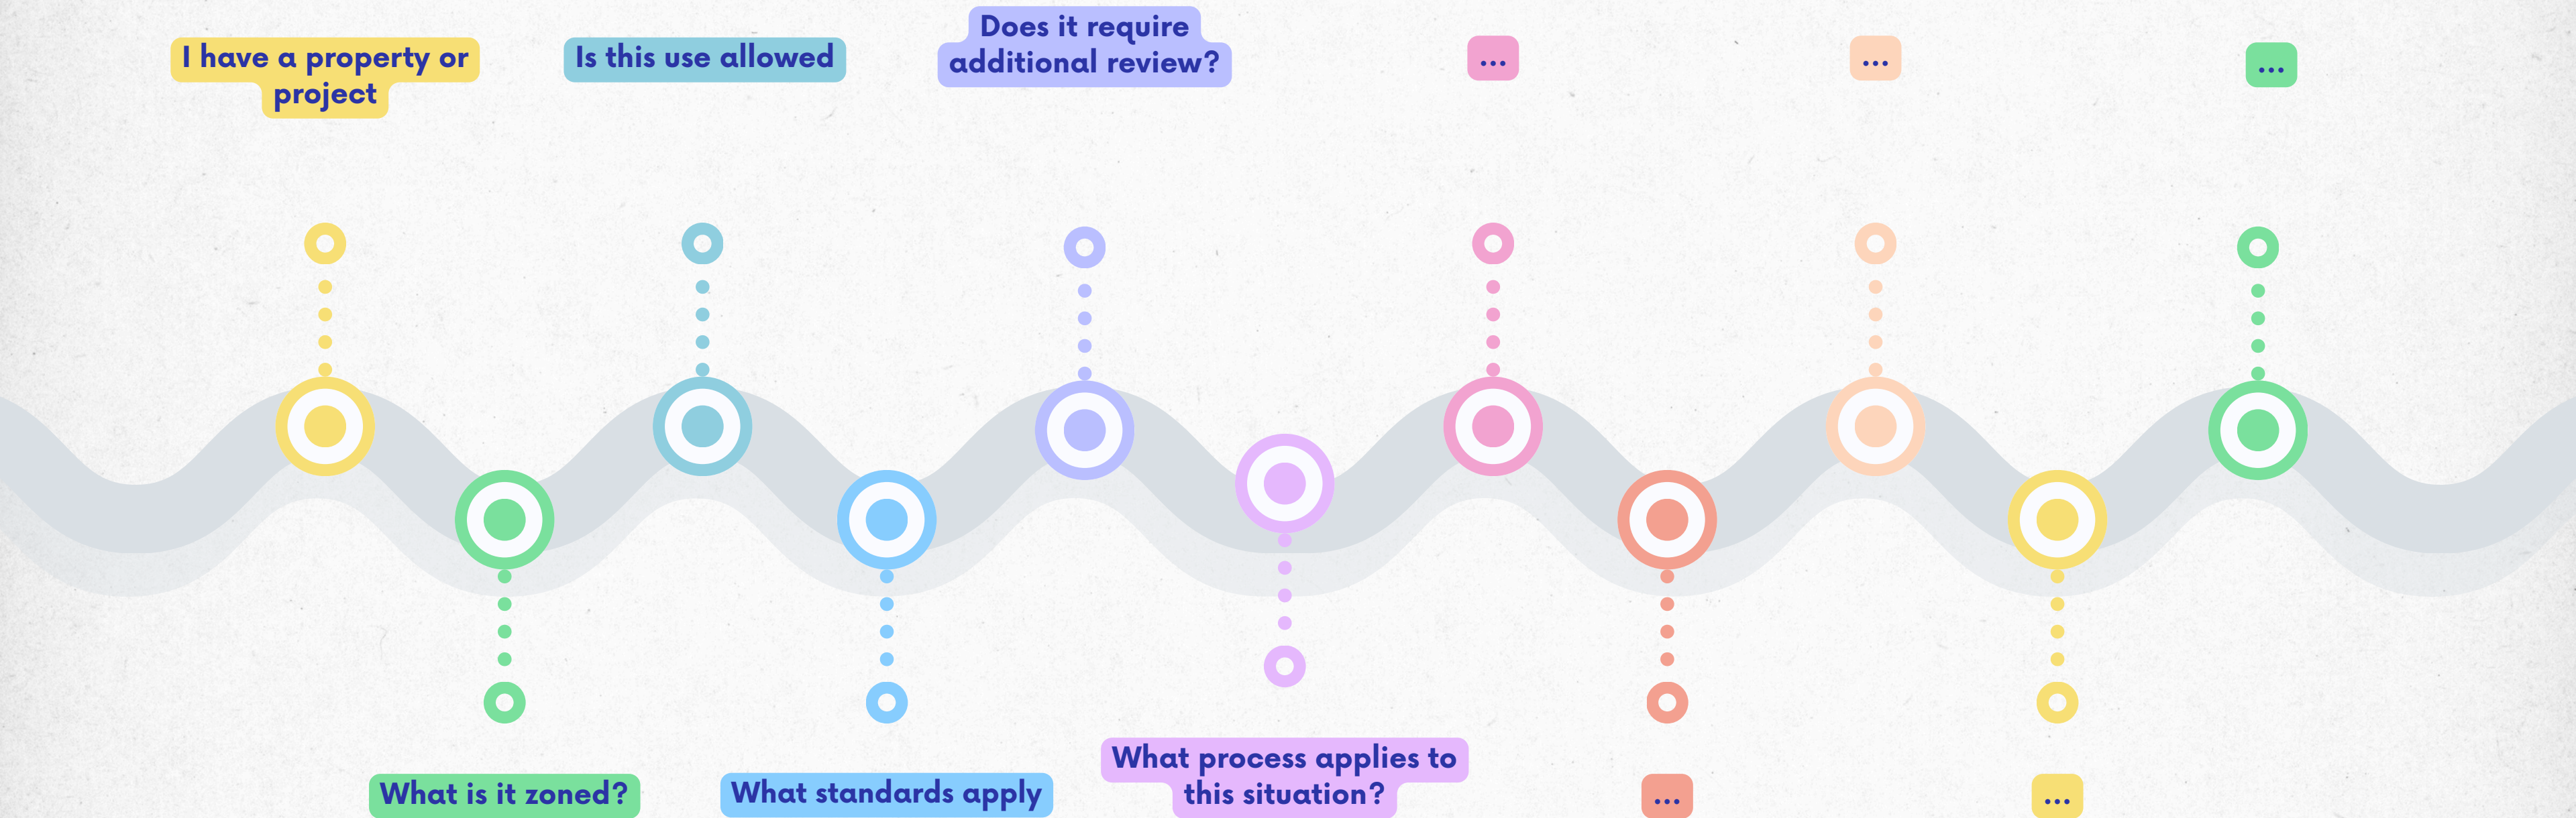

Where should I look?

Who should I ask?

[illegible]

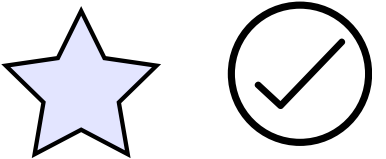

How does someone navigate this?

Is this correct? Change? Additions?
What is the series of questions on how
to find out what you need to know.

Public Video

What are the 4-6 things we want someone with no planning background to walk away understanding?

Brainstorm Area

What is zoning?

Why do we have it?

Who makes zoning decisions?

What can and can't the City control?

How can the public participate?

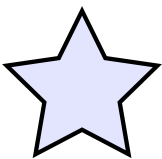

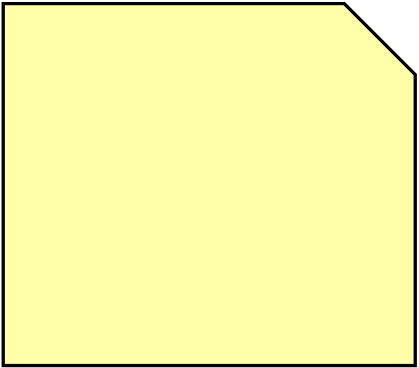

Where can people learn more?
