

# REALTORS

Help your clients  
check before they buy!

When a client is considering a property for a specific business or use, encourage them to contact Community & Economic Development **BEFORE** the purchase or lease is finalized.

## COUNTY DATA IS NOT CITY ZONING

County property information does not confirm City zoning or permitted land use. Verify with the City before purchasing or leasing a property

## VERIFY WITH THE CITY

A quick conversation now can save months of delays and thousands of dollars later.

## BEFORE YOU SIGN, CALL US!

You don't need to know the development process, and you don't need to know exactly who to speak with. That's our job.

### Show us two things:

The Property  
you're considering.

The Plan  
for what you want  
to do there.

We'll help you figure out what questions need to be answered and who needs to be involved.

Community & Economic Development

**PROPERTY**  
*for your business?*

## KNOW BEFORE YOU BUY.

What to check. Who to call.  
What to know before you sign.

A guide from CED  
Community & Economic Development  
**507-334-0100**

## BEFORE YOU BUY:

### A Smart Buyers Checklist

#### What is the property zoned?

Verify zoning with the City of Faribault. Don't rely on County property use information.

#### Is your intended use allowed?

Is it permitted use, or does it require additional approvals?

#### What does the building need?

Even if the use is allowed, the building may need improvements or additional equipment before you can open your business.

#### What approvals are needed?

Permits, reviews and fees may be required. Know the process and the cost before you commit.

## WHAT APPROVALS ARE NEEDED?

Depending on the property and your plans, your project may involve several steps.

- ✓ Permits, reviews and fees may be required.
- ✓ Multiple City departments or outside agencies may be involved.
- ✓ The process can take time. Know the timeline for your situation before you commit.
- ✓ Find out about application and review costs up front.
- ✓ Be informed so you can make confident decisions.
- ✓ A little planning now can save you time, money and a lot of headaches.

### EXAMPLES MAY INCLUDE:

- Zoning/ Land Use Review
- Building Permits
- Fire Department Review
- Engineering/ Site Plan
- Water/ Sewer/ Utilities
- Historic Preservation
- Sign Permits
- Other Approvals

## Building New?

Vacant land doesn't always mean buildable land. Before purchasing, confirm that your plans work with the property's zoning, setbacks, utilities, access, storm water, and other site requirements. Early review can help identify potential challenges before you buy.

## THE USE MAY WORK.

### The space may still need work.

An allowed use doesn't mean a space is ready to operate. Building, fire, and other requirements may still apply before you buy, lease, or renovate.

### Buying in downtown or a historic building?

Older and historic buildings can come with additional considerations. Talk with CED early so you can better understand what may be involved, before those costs become surprises.

### Some businesses need state approval, too.

Depending on your business, Minnesota may have additional licensing, plan review, equipment or facility requirements.

Restaurants

Childcare

Healthcare

Lodging

and other specialized businesses.

### Talk with CED early.

We can help identify which requirements may apply and point you in the right direction.

A quick conversation with CED early on can help you plan with confidence.

We'll help you understand what's allowed, what's required, and what it will take BEFORE you're financially committed.
